RENAULT TRUCKS Defense presents *Remote maintenance* at Eurosatory

The warning and surveillance modules of RENAULT TRUCKS Defense (RTD) e-Support have been assessed on military equipment in operational situations. Enabling remote in-service maintenance, these Health Usage Monitoring Systems (HUMS) represent the future, and offer the guarantee of support at affordable cost.

The *warning sensors* (in the event of faults occurring which could interrupt a mission) and *surveillance sensors* (for tracking major function potential) have been installed on a fleet of vehicles destined for the training of military units in the Champagne and Provence camps. They have quickly demonstrated the utility and relevance of the real-time collection of precise data concerning the state of health of equipment.

Complemented by *diagnostic and troubleshooting aid* modules, along with *maintenance and design* modules for analyzing and exploiting technical incidents, all of these mechanisms will provide military users and maintenance technicians with the guarantee of improved technical-operational availability, and will help to secure operational missions.

They will make it possible to anticipate malfunctions, reduce vehicle downtime and enable optimized dynamic configuration management.

In this way they will help to address manpower constraints, equipment complexity and budgetary strictures.

Stand F140 and B568, Hall 5A.

VOLVO GROUP GOVERNMENTAL SALES is in charge of Defense, Security activities and Emergency services within the Volvo Group, with the following brands: RENAULT TRUCKS Defense, ACMAT Defense, PANHARD Defense, VOLVO Defense and MACK Defense. VOLVO GROUP GOVERNMENTAL SALES is a leading player in the field of wheeled military and security vehicles.

RENAULT TRUCKS Defense, one of three participants in the Joint Venture (GME) which was awarded the Scorpion contract by the Minister of Defense on 5 December 2014, is to participate in the development of the French Army's new generation of front-line vehicles Griffon and Jaguar. RENAULT TRUCKS Defense is in particular responsible for supplying the powertrains for these two vehicles, and for providing the whole supply chain for the spare parts and components of the Scorpion program.
